

## **TESTIMONIAL**

Name : Disha N. Nandwani.  
Age : 48  
Address : Chembur, Mumbai 71.

Treatment : Laproscopic Procedure for Umbilical Hernia.

Laproscopic Procedure Performed by Dr. Jignesh A. Gandhi Gastro Intestinal Surgeon on 26.09.2014.

### Testimonial

Handsome, Smart and unlike other Surgeons I have met. He does not have an attitude like other Surgeons. His first concern is that you are comfortable, you understand the procedure, the risks, the benefits and the post operative care to be taken.

I met 3 other Surgeons before being referred to Dr. Gandhi. Upon meeting him, I realized that he was quite amicable, co-operative and he really took the pain to explain the problem, what could be done, the options available, pre and post operative care.

Other Surgeons had suggested one or the other procedure but Dr. Gandhi only explained the options and gave me the liberty of choosing the line of treatment.

During and after the Surgery, He visited frequently, was very assuring , very responsive and very patient with advice and suggestions.

I am personally very satisfied and happy with the entire treatment and the follow up visits, advice and suggestions.

I would always happily recommend Dr. Jignesh Gandhi to anybody needing similar treatment.

I sincerely pray that he continues to add cheers to the lives of a lot of patients and their families with the powers of healing, kindness and compassion that God has bestowed upon him

I wish him all the best.

Regards

DISHA N. NANDWANI
